GREEN CITY COUNCIL

Dear City of Green City Council,

I wanted to tell you about the new neighbors who moved in last week. They have not been very hospitable, in fact they have been down-right destructive. So far our electric line has been downed leaving us with no power for several hours. Our cable has been down for overnight, leaving us with no phone, internet, TV. The roads have been blocked by trucks and workers. The landscape is being scarred by holes being dug and trees being taken down. We are being advised to have our water tested because the construction process could contaminate our personal water supplies. (Not to mention the reservoir.)

I realize we are in the lower part of the community, and county, out of sight of most of the population. Not many venture down this way except those who fish or enjoy the park. So not many citizens actually see what is going on in the area. Our once-peaceful-country setting is being destroyed because the pipeline is coming through, even though our community did not invite them.

I wonder how often you each come and observe what is happening to our City of Green. Who is actually inspecting what is going on and determining the safety of the project? And who is respecting the property of the county, city and land owners?

I am sad about this project and disappointed that it was even permitted to take place.

Yours truly,

 
Lucy Downs David Downs
