

January 21, 2021

I am requesting that consideration be given to passing 2021-R04 on 2nd Reading (February 9, 2021) for two reasons.

This legislation is necessary to allow processing of bills submitted by Burgess & Niple for work performed as far back as November of 2019. After a lengthy period of review by ODOT, it was determined that modification number 4 (approved by City Council in June 2020) needed to be written in a different format than was done originally because it involved credits for unneeded items of work that would have received federal funds. Now that this has been cleared up, we would like to be able to issue payment to B&N as soon as possible.

As the net increase of the contract is the same as was indicated in 2020-R44 (\$32,716.00) and only the attached Exhibit is being modified there might not be a need for much further discussion.

Thank you,

Paul
