Hello , my name is Alexis Butler. I am a current resident of green and would love to be able to have chickens. I am a baker and the cost of eggs is outrageous. This could be more beneficial for my family as well . I have three children that go to green and I truly care about what my children consume . Having said that we also pay so much for taxes in green and I hope we are allowed to do what we want on our property.

Thanks again ,
Alexis Butler
