The Home Owners Association has approached the City of Green to assist them in the replacement of the poles and light fixtures in all phases of Mayfair East Subdivision. The first step was the petition signed by 92% of the property owners of the subdivision, the second is a piece of legislation that establishes the Resolution of Necessity and outlines the plan, costs. There will be more legislation. The estimated yearly cost is \$ 312.00, that would be assessed to taxes for a period of 5 years, (this is currently an estimate), for a total of \$1560.00, over the 5 years, this could be paid in full and no assessment. This could go up slightly or come down, we will not know until the project is bid, but no assessment will be put on until all the costs are totaled and divided by the 95 parcels in the allotment.

Hi Wayne,

Can you answer them? I think you can better explain.

Molly

Dear Molly Kapeluck,

We were out of the country when the notice of public hearing for the Street Lighting District Mayfair East Subdivision was issued. Could you please provide us with an update of where this issue stands? Has there

been a vote by those who will be financially affected? If approved, what is the total amount to each property owner? Your letter only provided the estimated yearly cost and omitted the total or for how long this assessment will last.

Sincerely,

Jerry and Theresa Moon
