Re: OUPS Request # 2616604542

ENTIRE PROPERTY FARTHEST POINT OFF ROAD: APPROX 200 FT - UP TO FENCE DISTANCE FROM CROSS
STREET: CORNER OF

Dear PAM HARBIN,

We received your Ohio811 inquiry referenced above. The approximate locations of Enbridge Gas Ohio's (EGO) facilities are illustrated on the enclosed map.

As required by statute, EGO acknowledges its pipelines, as a rule, were installed at approximately 36" deep. At concerned points where you need to know the location and elevation of EGO's pipeline, you may excavate by hand digging to temporarily expose the pipeline enabling you to obtain the necessary information. Contact the Ohio811 (1-800-362-2764 or 811) prior to your excavation and submit an excavation ticket. In addition to hand digging, you may use non-destructive pipeline location methods, such as those performed by companies like SoDeep or T2 Utility Engineers (330-486-0932).

TO DISCONNECT AND CUT AN EXISTING NATURAL GAS SERVICE LINE IN PREPARATION OF REMODELING OR DEMOLISHING OF A STRUCTURE, please call (800) 544-5768.

FOR NEW RESIDENTIAL SERVICE OR IF YOU CURRENTLY HAVE NATURAL GAS SERVICE, BUT ARE ADDING NEW NATURAL GAS APPLIANCES TO YOUR BUILDING: Please call (888) 619-0786 or email: ohioconstructionsupport@Enbridge.com.

FOR NEW COMMERCIAL SERVICE OR IF YOU CURRENTLY HAVE NATURAL GAS SERVICE, BUT ARE ADDING NEW NATURAL GAS APPLIANCES TO YOUR BUILDING: Please call (888)-221-5674 or email EGOHCandi@enbridge.com.

FOR RELOCATIONS: Please send a copy of your proposed plans to this office for review and resolution of any conflicts between your plans and EGO facilities at least 4 months prior to your constructions. Please send all plans and correspondence to the following address:

Enbridge Gas Ohio
Attn: 2nd Floor Relocation Design
320 Springside Dr, Suite 320
Akron, Ohio 44333
Email: relocation@enbridge.com
Ph: 330-664-2409
Fax: 888-504-0126

EGO's response is based on the project information you or others provided for this project. The location of EGO facilities within the project area are based on the records of the original installation, and are therefore approximate, and not guaranteed. EGO has no knowledge or information of changes that may have been made to the site after the original installation. Any reliance on the information provided is solely at the risk of the user, who agrees to indemnify, defend and hold EGO, its owners, officers, affiliates and subsidiaries harmless, to the fullest extent permitted by law, from and against any and all loss, claims, demands, damages, injuries or suits in anyway arising out of or incident to its use.

EGO requests that the following note be added to your plans for the benefit of your contractor:

"It is the contractor's responsibility to maintain the lateral and subjacent support of EGO's pipeline(s), in compliance to 29 CFR, Part 1926, subpart P, (safe excavation & shoring). One-foot minimum vertical and horizontal clearance must be maintained between EGO 's existing pipeline(s) and all other improvements. Extreme care should be taken not to harm any EGO facility (pipelines, etc.) or appurtenance (pipe coating, tracer wire, cathodic protection test station wires & devices, valve boxes, etc.). EGO facilities must be protected with a tarp during bridge construction. The contractor will be responsible and liable for ensuring that all EGO existing facilities, above and below ground, remain undamaged, accessible and in working order. The crossing of EGO's pipeline with another steel facility may create a potential corrosion issue for the proposed facility and the existing EGO facility. Please contact EGO 's Corrosion Department: James Clawson (330-805-8179), Austin Speed (216-317-4486), or Cortez Sanders (216-312-2225).

Since over 1000 gas companies now operate in Ohio, proper pipeline identification is necessary to assure minimum critical response time. We request that you add the following general note to your construction plans: EGO, 1-800-362-7557. EGO's facilities should be identified appropriately on your construction plans.

EGO will not be liable for nor accept any contractor delay costs that the company has not had an opportunity to review, dispute and/or resolve.

Sincerely,

Enbridge Gas Ohio

If there is a gas emergency, such as a natural gas leak, odor, or hit line, please report this immediately to 877-542-2630.

Hi. Is the dotted line the gas line? My surveyed property records is showing a gas easment line that doesnt match the map you sent.

Is there someone i can speak to?
