To Whom It May Concern,

In regard to the variance being filed for the driveway at 6267 Caribou Drive in Clinton, Ohio, Mr. and Mrs. Pritt have asked us to write a letter showing that we are in compliance with the city's requirements for the Right of Way of the drive. I have spoken with my crew who set up the driveway, as well as my crew who poured it, and have verified that we have done the following according to the city's ROW requirements:

- Subgrade compaction
- 4" of #57 Limestone aggregate base
- 6" concrete apron
- Broom finish with fiber mesh (wire does not look to be a requirement, only an option per the specifications)
- Expansion joint used at right of way line.

Thank you.

Sincerely

Rachel Kishel

Office Manager
