Re: **Requesting First Reading Passage for the following legislation:**

## **2020- R24**

---

Please consider the following legislation for first reading passage:

*2020-R24.* This legislation provides funds to provide monitoring of the project as needed per the terms of the Nexus settlement agreement.

With final restoration to be completed this summer, the funds will be used to continue to monitor the final restoration. We are requesting first reading passage because spring is just around the corner (which can result in wet or washed out areas, depending on the weather). Having the funds in place to request our environmental consultant to review any residential or City concerns along the pipeline would be beneficial.

Thank you for considering first reading passage on this piece of legislation.
