Subject: Charleston Place Allotment

Good evening,

I have been trying to figure out a way to construct this email in a way that I don't come off as a completely irrational person, but I am so tired of not being listened to as a member of the Green community. I had absolutely no idea that there was a consideration for a road to be put in next to our allotment. These actions along with your agenda to develop every single last section of land available in Green is exactly why I have never provided my support. I have wrote about my objections to other things in the community and it isn't even considered because the decision is already made! The pipeline, the trash, the development of the plaza on Massillon road. We already have so much street noise from Wise, the highway and the construction of the new allotment of cluster homes. You are disrespecting the members of this community and devaluing our homes.

It sounds like this decision is made, but I am writing for any consideration to keep the noise and light pollution down. I used to value my view outside my bedroom and morning room window and now that will be gone. I came from a community that became overdeveloped and people got tired of it and moved out. They are now left with empty plazas, crumbling builds and neglected roads.

Desiree Dennis
