**Subject:** Remarks for the next City Council Meeting

Dear Council Member,

Due to the limitations of public participation at Council meetings due to COVID, please read my remarks below at the next City Council meeting.

Dear City Council, I would like to weigh in with my opinion on how I would like my Parks Capital dollars spent. I feel the money would best be spent on building an outdoor pool and a rec center that contains, among other things, an indoor walking/running track. I understand that Green has a YMCA that offers a pool, however, it has very limited times available for open swim use that are convenient to working parents who would like to take their families. Also, an outdoor pool during the summer months encourages families to spend time outside, versus being cooped up at an indoor pool, and an indoor track enables those who enjoying walking and running to get this exercise in during the cold winter months.

I do not support the Parks Master Plan as it is currently drafted. I do not support using tax dollars and resources to build trails and taking property to do so. There are many trails already available to community members and I believe the tax dollars would be better spent in providing the community something it does not already have. Thank you for your time and consideration.

Sincerely, Rebecca Danner  
532 Saturn Dr.
