**Date:** Jan. 26, 2018  
**Subject:** Pavement Marking Program

---

Please find enclosed legislation requesting to join the Summit County Pavement Maintenance for the purposes to bid the needed long line pavement markings and auxiliary pavement markings. The long line work is estimated at approximately \$42,000. The auxiliary markings is estimated at approximately \$175,000. The money is budgeted under Service Department Street Construction, Maintenance, and Repair fund 201-2100-52413 at \$250,000.

The Engineering Department determined the long line estimate to include approximately 80 miles of work. The auxiliary markings include items such as crosswalks, school markings, arrows, parking stalls. Last year was the first year we utilized the Summit County program to bid our auxiliary pavement markings. The process went very smooth, we were satisfied both with the price and the outcome of the work. We are asking for first reading passage due to the County deadlines. Please let us know if you have any questions about this upcoming project.
