**Subject:** Annual Sidewalk Repair Program  
**Date:** Saturday, October 18, 2025 9:17:23 AM

---

Hello Green City Council, I am writing to ask that next year and future years you find a way to start the sidewalk repair program earlier in the year. I live in the King's Ridge development and as of October 18, 2025, no actual work has started in 2025. The disrupted sidewalks have been measured; slabs being worked on this year marked and trees that will be removed have been marked.

There are two basic reasons that I ask to be done earlier in the year.

1. At this point it is unlikely that grass seed will germinate in the areas where trees are removed. This will require follow-up in the spring, which might not be necessary if the work was done earlier in the year.
2. Green Halloween trick or treat is coming on October 25; it would be nice if the repairs had been done in advance of that.

Thank you for considering this and acting accordingly.
