

Interoffice Memorandum
City of Green
Public Service Department

To: City Council
Cc: Mayor Neugebauer, Lisa Carey Dean
From: Valerie Wax Carr, Director of Public Service *WC*
Date: Nov. 16, 2021
Subject: EV Charging Stations – Legislation Pricing

As most of you have noticed by now, we have two new electric vehicle (EV) charging stations. They are up and ready to be used. However, we need to establish the final pricing for use. We have reviewed rates of other municipalities and have worked with our account provider, Charge Point for recommendations. The submitted legislation establishes the ability to set a charging rate. Obviously, we would like to activate the EV chargers as soon as possible so we are asking for **first reading passage**.

Please find attached a memo prepared by Sarah Haring, Community Development Administrator, which provides the background and details of the EV charging stations a necessity to set rates. I personally want to thank Sarah for the tremendous work she has done on this project, including obtaining the grant and implementing the steps to bring EV to Green!
