Wayne and I discussed. He responded to the resident, see below. However, I did want to add that I went out personally and looked at the site. There was a small amount of trash that I pick up along the roadway. The top wooded area was actually the cleanest I have seen. The grass along the road was at decent length. The area behind the guardrail was much higher, so we will have the boom mower trim that back. Also we installed no littering signs last year, so the sheriff can enforce better. I will ask the sheriff to patrol the area more. Please see attached pictures.

The City does own some land at this intersection, of where Wonder Lake was, we are working on plans to convert this area into a Bio-Retention area to provide for water quality and storm water management. I have talked to our Service Director and she visited the site and will be discussing future maintenance with her staff. Just FYI, we have over the past 2 years completed a clean green project in this area, we moved that to a different site this year but may need to make it an annual event. Thank you for making us aware of the situation.

Direct my comments to: Mayor's Office
First Name: Ron
Last Name: Foxx

What can we do for you?: It is my understanding that the City of Green owns the property at the corner of Cottage Grove Rd. and Wonderlake Dr. If this is true, you should take a look at it. It is a disgusting eye sore. Overgrown, beer cans, garbage and anything else that can be thrown out of a car window. Would you please respond thank you - a 70 year Green resident.
