Subject: FW: Council Question

Nichole,

Same for this one.

Subject: Council Question

Hello, with the increase in residents teleworking, are there plans to develop a true fiber network similar to Fairlawn Gig, or plans from private companies to develop a true fiber network? Current systems are very unreliable, especially with the increased usage over the past year. I have the top tier from Spectrum and experience outages as well as slow speeds all the time, weather during peak times or not. A true fiber network would not only benefit residents, but business and the schools as well.

Thanks!

Sidney Cowan
